Release Black Ops 3 Zombie GSC Mod Menu "EnCoReV14" by CabCon | First Version + Download.

Hello guys, today I want to share you my next Black Ops 3 GSC Mod Menu Project. It's called EnCoReV14 which will be much bigger than any of my previous Black Ops 3 Mod Menus. This is the first preview of the mod menu, updates will come. Feel free to give feedback below! Happy Modding!

Will I get banned? No. Black Ops 3's Mod Support System disallows mod users from mixing with non-mod users. You will not be able to connect to the official dedicated servers whilst any mod is active.

I am receiving the error: "could not find zone: \*\*\*\_zm\_mod", what do I do? See here:

Can I play with others online though still or is it only solo? Yeah, you can still play with others online through private matches. You can join other player's games also through the Server Browser in game.

Do I need any other tools to get this to work? No. Just follow the "How to." guide above, no other tools are needed.

Will this affect my online rank/score? No. Any progress made using mods will not be carried over.

Will this prevent me from connecting to official multiplayer servers in the future if I use this? No. When you enable any mod on Black Ops 3, you are isolated from the official dedicated servers so you cannot interfere with others. You can simply disable the mods by going into your Mods at the Main Menu and hitting the disable button. This will revert you back to the default settings and you will be able to connect to online servers normally again.

I joined someone's game but the menu doesn't work. Only the host or other verified users can open up the menu. If the host has verified you, then you will be able to use the menu.

I want to give my friends the menu/money/godmode but they don't show up on the client list? You need to restart the match with the player(s) still in the game for them to appear on the menu's client list. I recommend installing the Console Improver created by ElectroTechNerd and typing "fast\_restart" in the console so you don't need to exit back to the lobby directly.

Some of the features in the menu don't work properly, or at all. CabCon has mentioned on his forum that this is not the final release and there will be changes made to the menu in the future. Remember to visit the forum page listed above for news and updates.

Can I use this menu in multiplayer or campaign? No. A separate menu for multiplayer made by CabCon can be found here though.

Can I use a controller with the menu? Yeah. the controls are the same as above.

Does the menu work on custom maps? Yeah. Works on all maps, though some custom maps can cause little glitches in the menu and some options may not always work as expected.

Controls Aim + Knife - Opens the Mod Menu. Aim - Cycle up. Fire - Cycle down. Use/Activate - Selects the option. Knife - Go back / close the Menu.

Bugs Round Menu doesn't work anymore (try to fix with the next update)

Credits CabCon - Creating the Mod menu Everyone else (Full credits list at final release)

Call of Duty: Black Ops 3 PS4 Online LAN System by TheoryWrong.

Proceeding his OrbisAFR.bin release, the Black Ops 3 PS4 Mods, a COD: BO3 PS4 Mod Menu demo and Call of Duty: Black Ops III PS4 Loader Tools PlayStation 4 developer @theorywrong with help from @DEv ShOoTz made available BO3Lan which is an Online LAN System

for Black Ops 3 on PS4 via his Twitter stream

This comes following the PS4 LAN with XBSLink Tutorial, recent Switch LAN Play by SpaceMeowX2 PS4 Guide and PS4 LAN Games List Spreadsheet covering Local PS4 Cooperative and Multiplayer Games.

Hopefully it'll be useful to PS4 scene devs who might come up with different online LAN for other games! Below are some Tweets making rounds on Twitter today also:

Call of Duty: Black Ops 3 (BO3) PS4 Mod Menu Demo Videos.

Following the PS4 GTA V RTM Modding Demo, today @ArthurBishop and @JarJarBlinx let us know in the PSXHAX Shoutbox that two new Call of Duty: Black Ops 3 (BO3) PS4 Mod Menu demos have surfaced from Free Games/Mods and Trvp Carlos on YouTube.

To quote from Trvp Carlos: The founder of this USB mod menu his channel is Zere.

What's going on everyone it's carlos. Today i'm going to show you guys how to install a BO3 Mod Menu with USB for PS4. NO JAILBREAK. You guys are probably saying this is fake and that there isn't even a jailbreak yet for PS4. That's true that there isn't but i have found an exploit that doesn't require a JAILBREAK.

This ONLY works on MULTIPLAYER LOCAL. If you go online with the mod menu, your controls won't work and you'll probably get Banned/Console Banned. There is probably a way to take it online but if i do find a way, i won't release it since you'll know what will happen if that occurs.

For certain reasons such as Treyarch/Activision striking me, i will not use anything in the Mod Menu. I will only show what there is.

1. Make sure USB is formatted FAT32/ if you don't know how to do that, here is a link:
2. Put folder in root of USB.
3. Turn on PS4 and plug USB in right USB slot.
4. Now go open up Media Player/ if you don't have it, download it off the PlayStation Store.
5. The folder that's in the USB should be there, open it.
6. There should be another folder called Menu/ open it as well.
7. You shouldn't see anything inside the folder but that's normal.
8. This triggers the menu but now you have to activate it.
9. Do this button combination: X, Dpad-Down, X.
10. Your done, back out of Media player and open up BO3.
11. Don't forget to play on LOCAL/ WE DON'T WANT TO GET CONSOLE BANNED.
12. Now once BO3 has loaded up, click multiplayer and fix the settings of the game to your liking and start the game.

PS4 AIO v1.4.0 with 4.05 Support and BO3 Mods by MODDED WARFARE!

Following his previous update, today PlayStation 4 developer @MODDEDWARFARE made available PS4 AIO v1.4.0 with a new demo video on his YouTube Channel which includes exploited 4.05 Firmware support alongside BO3 mods followed by v1.5.0!

To quote from the video's caption: PS4-AIO Release with 4.05 Support & BO3 Mods! (PS4 Jailbreak) Here's an updated version of my PS4-AIO tool which now supports 4.05.

Please download and install the latest version rather than trying to update any older versions.

- 1) With your PS4 go to this link: <http://crack.bargains/505k/>
- 2) If you have message "You're all set!" close the browser and reopen it again then you will have a message "Awaiting Payload. "
- 3) Open NETCAT GUI, change your IP Address with the one of your PS4, change "9023" by "9020", select the payload in the folder then inject it !
- 4) Launch Black ops III in Zombie mod, connect the PS4 and. enjoy !!

Hello World! I've been reporting on Sony PlayStation hacking news since 2000 and started PSXHAX in 2014 to cover PlayStation (PSX), PlayStation 2 (PS2), PlayStation 3 (PS3), PlayStation 4 (PS4), PlayStation Portable (PSP), PlayStation Vita (PS Vita), PlayStation TV (PS TV) and next-gen PlayStation 5 (PS5) platforms along with anything else of interest.

Click on my `UserName` author link above and you'll be able to view a filtered list of all of the articles I've contributed thus far to PSXHAX.COM .

If you enjoy gaming and would like to write (unpaid) for this site, Contact Us and we'll be happy to have ya join our Authors !

MODDEDWARFARE.

Feb 11, 2018 at 1:37 PM #92.

Make sure your PS4 IP is entered in the bottom left corner and then load up the IDC or Specter exploit on the webkit and inject the RTE payload which is in the the bottom right corner of the tool. The Red Not Loaded text should change to green and say loaded. Then press middle button on PS4 and start the game you want to mod like BO3. Once in the game click connect in side whatever tool you're using From this point just do what I do in the video. Fetch clients, click the client you want to mod and select a mod option.

MODDEDWARFARE.

Feb 19, 2018 at 12:54 PM #95.

I have created a new version that fixes some issues with the tool and adds an Infinite Warfare tool.

This video covers the Infinite Warfare tool and a tutorial on how to inject the payload and connect the tool.
